Outpatient Physician Note + Laboratory Report

Endocrinology | 28 April 2026

Patient Name	Rajesh Kumar	Age / Gender	54 Years / Male
Date of Birth	12 March 1971	Physician	Dr. Ananya Mehta, MD (Endocrinology)
MRN	10023456	Report Date	28 April 2026

VITAL SIGNS

Blood Pressure	148/92 mmHg (Target: <130/80)	Heart Rate	78 bpm
Temperature	98.4 deg F	SpO2	98%
BMI	29.4 kg/m2	Weight	82 kg

DIAGNOSES / CONDITIONS

Diagnosis / Condition	Severity
Type 2 Diabetes Mellitus (T2DM)	Moderate — Poorly Controlled
Essential Hypertension	Moderate — Suboptimally Controlled
Dyslipidaemia	Moderate
Early Diabetic Nephropathy	Mild — Early Stage

LABORATORY RESULTS

Test / Parameter	Result	Reference Range	Status
HbA1c	8.2%	<7.0%	HIGH
Fasting Blood Glucose	184 mg/dL	70-100 mg/dL	HIGH
LDL Cholesterol	142 mg/dL	<100 mg/dL	HIGH
HDL Cholesterol	38 mg/dL	>40 mg/dL	LOW
Triglycerides	218 mg/dL	<150 mg/dL	HIGH
eGFR	62 mL/min	>60	BORDERLINE
Urine Microalbumin/Creatinine	48 mg/g	<30 mg/g	HIGH
Serum Creatinine	1.3 mg/dL	0.7-1.2 mg/dL	HIGH

PRESCRIBED MEDICATIONS

Medication	Dosage	Frequency	Purpose
Metformin	1000mg	Twice daily	Controls blood sugar (diabetes)
Empagliflozin	10mg	Once daily	Lowers blood sugar; protects kidneys and heart
Amlodipine	10mg	Once daily	Lowers blood pressure

Medication	Dosage	Frequency	Purpose
Rosuvastatin	20mg	Once daily (night)	Lowers bad cholesterol (LDL)

IDENTIFIED RISK FACTORS

Risk Factor	Explanation
High cardiovascular risk	Poorly controlled blood sugar and BP damage blood vessels over time
Kidney damage progression	Early diabetic nephropathy detected — could worsen without management
Heart disease risk	High LDL, low HDL, and high triglycerides all elevate cardiac risk

PATIENT-FRIENDLY SUMMARY

Patient-Friendly Summary

Mr. Rajesh Kumar is a 54-year-old man with diabetes and high blood pressure. His blood sugar is too high (almost double the safe level), his blood pressure is above target, and his cholesterol is unhealthy. There are also early signs of kidney stress. His doctor has increased his diabetes medicine, added two new drugs (one that also protects the heart and kidneys), and started him on a cholesterol-lowering medicine. He is advised to eat less salt and sugar, exercise regularly, and return for a check-up in 3 months.
